

NAVEEN KUMAR N H

DevOps Engineer

Mobile: +91 9742113131

LinkedIn: <https://www.linkedin.com/in/naveen-kumar-n-h/>

Email: nhnaveen1994@gmail.com

Professional Summary:

- Around 8 years of experience in IT sector in Linux administration, build engineering and release management process, building and deploying applications by adopting DevOps practices such as Continuous development, Continuous Integration (CI) and Continuous Deployment (CD) in runtime with various tools like **Git, Maven, Jenkins, Ansible, Docker, Kubernetes, Terraform, Azure DevOps** and managing cloud services with **AWS**.
- Linux/Unix system administrator on Red hat EL, 5.x, 6.x, CentOS 4.x, 5.x and VMware environment. Involved in migrating physical Linux/Windows servers to cloud (AWS) and testing.
- Provisioning the infrastructure using **Terraform and Cloud Formation Templates**.
- Experience on complete software development life cycle (SDLC) with software development models like Agile, Scrum Model, JIRA, Waterfall models.
- Worked with Version/Source management tools like GIT, GITHUB, Bitbucket.
- Developed Build and deployment scripts using PYTHON and MAVEN as build tool in Jenkins to move from one environment to other environments.
- Experience in implementing Continuous Integration and deployment using various CI Tools like Jenkins and Configuration management tool like **ANSIBLE**.
- Good understanding and experience in building CI/CD pipelines using automation tools like Jenkins.
- Troubleshoot & Resolve builds failures due to infrastructure issues. Set up and execute process to code review system effectively.
- Experience in configuring, managing, and troubleshooting Server-side issue.
- Writing **Ansible playbooks** and **Puppet Modules** to automate the deployment of the applications to different Prod/ QA Environments.
- Performing automations by using **PYTHON** and **SHELL**.

- Responsible for the design and deployment of Builds, Scripts installation procedure and systems including source code control and issue tracking.
- Configuring the Docker containers and Docker compose files for different environments.
- Integrate jfrog to Jenkins and push the artifacts in artifactory.
- Managing deploying and maintaining application in DOCKER containers.
- Experience in **AWS EC2**, cloud storage **S3** and security services **IAM** and also in **VPC, Cloud, Amazon Elastic Search**, and Security Groups with an overall objective to improve the scalability, reliability, performance, and availability of the **cloud infrastructure**. Administrates the cloud development, test and production cloud hosted environments.
- Create and configure **S3 bucket** with required policy along with version control and life cycle management and archival of data using Glacier.

Technical Skills:

• Operating Systems	• Windows, Red Hat Linux, UNIX, Centos, Ubuntu, Mac
• Database	• MySQL
• Version Control Tool	• GIT, GITHUB, Bitbucket, SVN
• CI/CD tools	• Jenkins, GitLab, Azure DevOps
• Configuration mgnt Tools	• Ansible, Puppet
• Build Tool	• Maven
• Scripting	• Shell, Python, GROOVY
• Monitoring Tools	• CloudWatch, Datadog, Splunk, Grafana, Dynatrace, AppDynamics
• Orchestration/ Containerisation tools	• Docker, Kubernetes
• Cloud Services	• EC2, VPC, IAM, S3, IAM, ELB, Autoscaling, EBS, Cloudfront, Cloudtrail, ECS, API Gateway, App mesh

Education:

Bachelors in Business Management from Seshadripuram institute of commerce and management (Bangalore University: 2012-2015).

Experience:

- Currently working as a **Senior Consultant** at **Capgemini Technologies India Pvt Ltd. (2021- Now)**
- Worked as a **Senior Software Engineer** at **Wipro Technologies. (2020 - 2021)**
- Worked as a **Senior Associate** at **[24]7.ai (2016-2020)**

Project 1:

- **Project** : **Halliburton**
- **Role** : **DevOps Engineer**
- **Environment** : **Amazon Web Services, IAM, S3, EC2, VPC, cloud watch, Maven, SVN, GitHub, Ansible, Docker, Kubernetes, Agile, Apache Tomcat, PowerShell, Jira, JSon, Bash.**

Description: - Halliburton Company is an American multinational corporation and the world's second-largest oil service company which is responsible for most of the world's fracking operations. It employs approximately 55,000 people through its hundreds of subsidiaries, affiliates, branches, brands, and divisions in more than 70 countries. The company, though incorporated in the United States, has dual headquarters located in Houston and in Dubai. As a DevOps Engineer, I was responsible to build and run large-scale web production system and application environment to ensure site.

Responsibilities:

- DevOps Workflow representing all stages starting from SCM Commit Build, Integration Build Which Compiles Code, Junit Test cases and Code Coverage, Build and Bundle, Publish with Lead Approvals and Deployment of Artifacts.
- Create and configure Jenkins server using Terraform and Ansible.

- Use of Docker, Kubernetes and OpenShift to manage micro services for development of continuous integration and continuous delivery.
- Launching AmazonEC2 Cloud Instances using Amazon Web Services (Linux/ Ubuntu/RHEL) and Configuring launched instances with respect to specific applications.
- Installed application on AWS EC2 instances and configured the storage on S3 buckets.
- Managed IAM policies, providing access to different AWS resources, design and refine the workflows used to grant access.
- Created AWS Route53 to route traffic between different regions.
- Provisioned EC2 instances, configured auto scaling and defining cloud formation JSON templates using Ansible modules.
- Deployed and managed web applications and services into AWS by using Elastic Bean Stalk.
- Use of Docker, Kubernetes and OpenShift to manage micro services for development of continuous integration and continuous delivery.
- Implemented and maintained the monitoring and alerting of production and corporate servers/storage using AWS Cloud watch.
- Involved in creation of virtual machines and infrastructure in the Azure Cloud environment.
- Used various Jenkins plugins like Git Plugin, cloud formation plugin, Puppet plugin, shared workspace plugin, parameterized build plugin etc.
- Branching, Tagging, Release Activities on Version Control Tools: SVN, GitHub.
- Worked on developing the backend part of the application involving Spring 3, JPA and Hibernate.

Project 2:

- **Project** : AFLAC (American Family Life Assurance Company)
- **Client** : AFLAC
- **Role** : DevOps Engineer
- **Environment** : Amazon Web Services, IAM, S3, EC2, VPC, Cloud Watch, Azure, Maven, GitHub, Chef, Puppet, Ansible, Terraform, Docker, Kubernetes, Agile, Apache Tomcat, Junit, PowerShell, Jira, JSon, Bash.

Description : Aflac Incorporated (American Family Life Assurance Company) is an American insurance company and is the largest provider of supplemental insurance in the United States. It was founded in 1955 and is based in Columbus Georgia. In the U.S., it underwrites a wide range of insurance policies, but is perhaps more known for its payroll deduction insurance coverage, which pays cash benefits when a policyholder has a covered accident or illness. The company states it "provides financial protection to more than 50 million people worldwide".

Responsibilities:

- Created release branches in GIT by GIT Administration including branching, reporting and assisting with project and end user support.
- Responsible for Continuous Integration and Build verification test for global OEM's.
- Developed build scripts using MAVEN and Ant as the build tools for the creation of build artifacts like jar, war or ear files.
- Implemented SonarQube for code quality check and Nexus repository and integrated them into Jenkins to achieve Continuous Integration.
- Experienced in Build, Deployment, and Configuration and Release management
- Worked on AWS services such as Setting up new server (EC2) instances/services in AWS, configuring security groups, and setting up Elastic IP's, auto-scaling configuration, and Cloud Formation and OpsWorks.
- Designed AWS Cloud Formation templates to create custom sized VPC, subnets, NAT to ensure successful deployment of Web applications and database templates.
- Experience in setting up the build and deployment automation for Terraform script by using Jenkins
- Responsible for implementation of scheduled Builds using Jenkins includes installation of Jenkins, Configuration of Jobs for automated Build and deployments.
- Managing all phases of Build and Release activities and deployment
- Responsible for Creating, Deploying and Posting Patches, Automating Patch Build Process.
- Experience in setting up the build and deployment automation for Terraform script by using jenkins
- Worked with Subversion, Proposed and implemented branching strategy.

Declaration:

I hereby declare that the above-furnished details are authentic to the best of my knowledge.
